**Pest Control Products  
Regulations Pertaining to Material Safety Data Sheets**

The new Regulations pertaining to Material Safety Data Sheets are expected to be re-published in Canada Gazette Part I in November 2007.

Originally published in 2004 they needed to go back for public comment because of the time delay since first notice before being implemented by Notice in Canada Gazette Part II, expected in Fall 2008.

These regulations will detail the formatting and information requirements for Material Safety Data Sheets on Registered Pest Control Products.
