Pest Control Products First Aid Labeling Statements

On May 28, 2007 the PMRA posted the Regulatory Directive outlining the required modifications to label statements addressing first aid measures in the event of accidental ingestion of pesticides.

The Regulatory Directive is available at:

<http://www.pmra-arla.gc.ca/english/pdf/dir/dir2007-01-e.pdf>.

In general, the PMRA is moving towards consistency with Hazcom approaches in other jurisdictions for regulated products, it is no longer being recommended to “induce vomiting”.
