**Pest Management Regulatory Agency
Developing a **New** Management of Submissions Policy
(MOSP)**

PMRA announces a NEW Management of Submissions Policy (MOSP). The agency has been working with a Management Of Submissions Policy (MOSP) introduced as a regulatory proposal in 1996.

The original document does not accurately reflect all of the processes taking place at the agency. In particular, the agency is working on establishing a clear MOSP as it would apply to the large volume of Category C type of submissions that it receives every year.

The new MOSP will provide more accurate and predictable estimations of timing and the stages of submissions working their way through PMRA.
