ASTM D93 - Flash Point Determination by Pensky-Martens Closed Cup Tester

Dell Tech Laboratories Ltd. is pleased to announce that it now offers services for the determination of flash point by **ASTM D93 - Flash Point by Pensky-Martens Closed Cup Tester**.

The Pensky-Martens Closed Cup Flash Point tester is used to determine the flash point of viscous or film-forming liquids and liquids with a flash point greater than 93°C (200 °F)

ASTM D93 is referenced as an acceptable test method for the classification of flammable liquids under Transportation, Consumer and Workplace regulations including DOT, TDG, ADR, OSHA, WHMIS, CPSC, CCCR and GHS.

Please refer to the Lab Performance Testing area of this website for a complete list of the test methods we offer. New test methods are being added constantly - contact us directly if there is a specific test method you are interested in which does not currently show up on the list.
